

## **5-06/040.30 - SA200 and TAC 700 Pepperball Launcher**

The SA200 and TAC 700 Pepperball Launchers are designed as less lethal weapons for use in a wide variety of tactical applications encountered within law enforcement. They may be used as an area treatment device to deploy chemical agents upon resistive suspects or as a direct fire weapon on assaultive / high risk suspects. The intended target zone for the Pepperball Launcher is low center mass, unless the situation dictates otherwise.

Caution shall be used when using nylon glass breaking balls. Each nylon round shall be loaded individually into the breach of an SA 200 Pepperball gun. The nylon round shall not be fired from a TAC 700.

The SA200 and TAC 700 shall not be altered or modified in any way. Only approved munitions shall be fired in this weapon. All repairs to the weapon shall be made by the Department armorer.
