SACR MDC/CAD CLEARANCE CODES

The Sheriff's Automated Contact Reporting (SACR) system application runs independently of the Computer Aided Dispatch (CAD) system and does not communicate information to or from the CAD system. Therefore, additional statistical (STAT) clearance codes had to be created in order to accurately capture specific information, referred to as "stop data" that must be reported to the California State Attorney General.

These reporting requirements apply when a person is detained or searched (including a consensual search), or property in their possession or control is searched, during an observation stop (traffic, pedestrian, bicycle), or a call for service. Exemptions to this requirement are identified in *Field Operations Directive 18-04*.

Starting March 1, 2021, a new STAT code will be required to clear **all observations and calls for service** from the MDC. This clearance code *must be entered in CAD in addition to the creation of a SACR record* entry in the SACR system.

Generally, the handling unit for a call is required to facilitate the documentation of all SACR entries in the SACR system. The handling unit should utilize the appropriate SACR STAT, as indicated below, to identify the total number of persons required within the SCAR entry, per incident. Assisting units on the same call should utilize the 940 clearance STAT.

All current STAT code usage requirements shall continue without change (e.g. 840,841, etc.). The 94X clearance STAT codes shall be utilized in addition to normal clearance procedures. The use of a 94X is mandatory for every clearance (observations and calls for service).

The MDC clearance code must match the number of persons entered into each SACR entry, as required by law. The new MDC clearance codes are listed below:

- **940** – No SACR entry required;
- **941** – One person SACR entry required;
- **942** – Two person SACR entry required;

- **943** – Three person SACR entry required;
- **944** – Four person SACR entry required;
- **945** – Five person SACR entry required;
- **946** – Six person SACR entry required;
- **947** – Seven person SACR entry required;
- **948** – Eight person SACR entry required; or
- **949** – Nine or more person SACR entry required.
