3-07/150.25 - Automated Management Information System (AMIS)

The Automated Management Information System (AMIS) is managed by the State Department of Motor Vehicles (DMV). The system provides access to the Driver's License file and Vehicle Registration file:

- DMV Driver's License file - contains individual's physical description, year of license expiration, special conditions regarding the status of the license, legal actions against the driver, abstract of court proceedings, and record of subject's accidents; and
- DMV Vehicle Registration file - contains name and address of owner (registered and legal), description, and current legal status of vehicle.
