

### **3-07/150.25 - Automated Management Information System (AMIS)**

The Automated Management Information System (AMIS) is managed by the State Department of Motor Vehicles (DMV). The system provides access to the Driver's License file and Vehicle Registration file:

- DMV Driver's License file - contains individual's physical description, year of license expiration, special conditions regarding the status of the license, legal actions against the driver, abstract of court proceedings and record of subject's accidents; and
  - DMV Vehicle Registration file - contains name and address of owner (registered and legal), description and current legal status of vehicle.
-
