

5-06/040.55 - CS Grenades and Their Use with Launching Systems

Currently, CS grenades utilized by the Department are of the flammable type. The possibility of a structure fire should be considered when making the decision for their use. For this reason, fire equipment shall be requested to the scene prior to the use of burning type gas inside a structure. In situations where the potential to start fires is a concern but the need to use chemical agents exists, consider using a non-burning agent.
