5-06/070.30 - CBRN Coordination Requirements

These action items are to be used as guidelines by units responding to incidents involving the potential use of chemical, biological, radiological, or nuclear weapons.

- Exact location of incident;
- CBRN indicators;
- Wind direction and weather conditions;
- Plume direction;
- Number of victims;
- Orientation of victims (direction headed, position, pattern);
- Types of injuries;
- Safe access routes;
- Containment posts (crime scene, but stay uphill, upwind, upstream, and avoid low lying areas);
- Traffic control points;
- Command post;
- Staging area(s);
- Obtain witness statements from safe distance; and
- **Protect against secondary devices/attacks**.
