

5-06/130.00 - Emergency Broadcast System (EBS)

The Emergency Alert System is a communication network which uses the South Coast Air Quality Management District's (AQMD) radio frequencies to communicate with participating commercial radio and television Stations/Units. Its purpose is the prompt dissemination of emergency and disaster information and instructions to the public. The SCC Watch Commander shall follow the procedures as enumerated in the current County Local Emergency Broadcast System Plan.

The EAS replaces the civil defense warning system sirens.
