• Chapter 3 - Duties and Conduct

Duties and conduct for Security Officers and Security Assistants while in the performance of their duties.

• • 4-03/010.00 Introduction

The provision and maintenance of adequate security measures throughout the County of Los Angeles Court System, and various other County facilities, is the primary responsibility of both Security Officers and Security Assistants.

The ever-present threats of courthouse disruption, violence, unauthorized access, theft, vandalism, and other crimes demands the implementation of a positive and effective security program to prevent or minimize these hazards.

In both its planning and procedural aspects, security is an operational problem with features unique to each facility and its occupants. To ensure adequate and effective security measures and procedures, responsibility must be delineated and individually placed within each facility.

• • 4-03/015.00 Duties

It is the duty of each Security Officer and Security Assistant to be at their post of assignment during working hours, and remain highly visible at all times, and to follow the rules and guidelines established by Department Manual of Policy and Procedures, Court Services Division Manual, and Court Services Division Directives.

Security personnel will also be required to monitor the areas in and around their fixed post. Be observant for disturbances, violations of fire safety standards, and report hazards such as blocked exits, and slippery floors.

Security personnel should be aware of points of interest in and around the courthouse. It is not uncommon for an officer to be asked where such places are located. Provide this information in a polite manner.

• • 4-03/020.00 Responsibilities

The major responsibility of the Security Officer and Security Assistant is prevention of incidents or offenses. A Security Officer and/or Security Assistant must be highly visible. By remaining visible, security personnel may discourage anyone who might be considering theft, damage, or personal injury to persons or property.

Security personnel must be alert, listen carefully, and be ever watchful. Prevention of entry of persons who are disruptive, abusive, and/or intoxicated is accomplished by being alert to all who enter your facility. Be aware of warning signs of various problems which may surface ahead of time, such as body language, tone of voice, slurred speech, manner and style of dress, eye movements, etc.

It is the responsibility of security personnel to be thoroughly familiar with the Security Plan of their facility. Only with complete knowledge and familiarity can security personnel act quickly and efficiently in any given situation. If an offense or incident does occur, security personnel must remain calm, observe and remember events, and report the occurrence to their supervisor.

• • 4-03/025.00 Authority

Security Officers and Security Assistants are not peace officers. Security personnel do not perform the same duties, receive the same training, or have the same powers under the California Penal Code as peace officers.

Security Officers and Security Assistants are public officers,(as defined in 831.4 PC), employed by the Sheriff of a County, whose primary duty is the security of a location or facility with respect to the patrons, employees, and properties of the employing County as directed by the Sheriff.

All security personnel should be reminded that the protection of people and property are their primary duties. Whereas, peace officers protect people, property, and enforce laws.

If a law is violated, peace officers are required to pursue and apprehend the responsible person(s). Security personnel's primary role is that of an observer and reporter. Under certain circumstances, it may become necessary for a Security Officer to pursue a violator only in tandem with a sworn Department member.

Refer to CSDM, 4-03/025.10 - Foot Pursuit Policy For Security Personnel.

Record all pertinent information and provide it to the proper law enforcement agency.

A Security Officer is responsible to observe, deter, pursue, and detain persons who have committed a crime on County property. However, they shall never independently place a person under arrest, but must detain the person for further investigation by peace officer personnel. The penal code defines "arrest" as the taking of a person(s) into custody, in a case and in the manner authorized by law. An arrest may be made by a peace officer or by a private person (834 PC).

• • 4-03/025.05 Relations with Peace Officers

Security personnel should maintain a good working relationship with other Sheriff personnel and law enforcement agencies. Security personnel must avoid doing any of the following:

- Never play "cop".
- Do not mislead people. Because of the uniform, the public may perceive security personnel as peace officers. Security personnel are not to imply or represent that they are peace officers.
- During an emergency, security personnel should not interfere with peace officers who may be on the scene. However, do cooperate to the fullest extent possible when called upon to assist.

• • 4-03/025.10 Foot Pursuit Policy for Security Personnel

Security officers shall not engage in a foot pursuit unless in tandem with a sworn Department member. If a security officer becomes involved as an assisting partner in a foot pursuit and is directed by the sworn member to put out a broadcast, the security officer shall be prepared to provide the following information in a timely manner:

- Officer identifier

- Suspect(s) exact location and description
- Reason for the foot pursuit
- Whether suspect is armed

Security Assistants shall not go in foot pursuit.

Refer to Manual of Policy and Procedures related to Foot Pursuits.

• • 4-03/030.00 Attitude

Security personnel shall serve the Sheriff's Department loyally and discreetly, and will not display poor judgment or fail to support fellow employees in the lawful performance of their duties.

Security personnel shall always maintain a professional demeanor. They shall perform their duties in a calm, but firm manner, acting together to assist and protect each other and County property.

Security personnel shall direct and coordinate their efforts in a manner which will establish and maintain the highest level of professionalism. Watching television, reading newspapers, books, magazines, eating, and smoking are prohibited while working an assigned area except during a break or lunch. Breaks and lunch shall be taken in a designated area or away from assigned post and out of view of the public, especially if eating or talking on a cell phone.

Security personnel should be aware of points of interest in and around the courthouse. It is not uncommon for an officer to be asked where such places are located. Provide this information in a polite manner.

People will remember their encounters with you, both good and bad. This will be retained for weeks or even months. Security personnel should remember they are often the first contact many people have with the court system. The impression security personnel make may have a lasting impression, positive or negative on the public's view or opinion of the Sheriff's Department.

• Chapter 4 - Security Policies and Procedures

Security in the Courts of Los Angeles County is of the utmost importance. Security officers and security assistants are the courts' first line of defense. The Courts and the public are best served by awareness and diligence to the policies in this section, such as interior and exterior searching of the premises, the public and employees to submitting to the search screen process upon entering the building, and other security measures that are in place to help provide a safe and secure environment for the public and employees by preventing the introduction of weapons or other unwanted disruptions.

• • 4-04/000.05 Professionalism and Courtesy During the Screening Process

Many people feel uncomfortable when faced with the situation involving a search, whether it is a visual, electronic scanning of their property or the use of a handheld metal detector. Most of the people attending court do not necessarily want to be there so their demeanor may not be the most positive, nor may they be on

their best behavior.

Try to understand the situation from the citizen's perspective and conduct any search procedure with professionalism and courtesy. You can better obtain a person's cooperation and have them leave with a better feeling about the entire situation based on the way they are treated.

• • **4-04/000.10 Managing Uncooperative, Argumentative, or Highly Emotional People**

Refer to CSDM, 1-02/070.00 -Managing Uncooperative, Argumentative, or Highly Emotional Persons.

• • **4-04/010.00 Search Screening and Recommended Staffing**

The search screen consists of one or more walks through metal detectors, an x-ray machine, and hand held metal detectors. The public must be funneled into the search screens, using natural barriers and stanchions. Also, a table and individual containers should be available so the public may place their personal properties, such as keys, coins and all other objects from their pockets, into it prior to passing through the walk through metal detector.

A recommended staffing configuration for a typical weapons screening site is a uniformed team of one Security Officer and two Security Assistants. Other configurations may be appropriate depending upon the circumstances.

• • **4-04/015.00 Nuisance Alarms**

Although the archway is the sensitive part of the metal detector, all detectors can be subject to "noise" from the outside environment. Typical sources of such noise are electrical interference from large motors, fluorescent lamps, copy machines, and radio transmissions. Nuisance alarms can also be caused by people moving large metal objects outside, but near the archway. It is also possible that an operator can cause nuisance alarms by leaning on the archway, causing mechanical vibration or by moving too close with objects such as radios, badges, weapons, and other security hardware.

Occasionally, outside interferences will trigger the alarm when someone is in the archway and is not carrying a detectable metal object. Thoroughness requires that if the alarm sounds, the individual must be examined for metallic objects with a handheld metal detector and/or by passing through the archway again, even if a nuisance alarm is suspected.

It would not be unusual for a person carrying a weapon to try to disguise the fact by bumping the archway as he moves through, and then try to convince the operator that the vibration was the source of the alarm. He might also try to convince the operator that the response was from some other object he was carrying and that no further investigation is needed. Always investigate all alarms thoroughly. Investigate the unusual.

• • **4-04/020.00 Security Search Procedures**

The security search process is to screen for weapons prior to persons being admitted into the facility. Searches may include the use of electronic metal detection, x-ray or visual inspection of the contents of any purse, parcel or carried items and can include “pat down” search if needed.

Refer to CSDM, 4-04/020.05, Search of Person and Property Entering the Courthouse

Any person entering the courthouse shall go through the court security search process of:

- An x-ray machine search of their property and parcels
- An electronic and/or “pat down” search of their person

This search is considered to be a consensual search. A person may verbally withdraw their consent to be searched prior to passing through the walk through metal detector. Court security personnel shall acknowledge the right of a person to withdraw their consent and they shall be directed to immediately exit the facility.

Note: Male security personnel shall not conduct a pat down search of a female passing through weapon screening. Pat down searches on a female passing through the weapon screening shall only be conducted by a female security personnel or a female Deputy.

However, if a person has begun the security search process by passing through the walk through metal detector and any of the below criteria is present, they may not withdraw their consent and the search shall be completed. The search of a person shall be completed if:

- You see or hear an activation of the walk through metal detector
- You hear an activation of the handheld electronic metal detector
- You see an object on the individuals person that you believe may be a weapon

Note: The objective of the screening process is to prevent weapons from entering the courthouse. Once you have a reasonable suspicion, that a person maybe concealing a weapon and attempting to enter the courthouse, the search shall be completed. This procedure shall be followed to deter a person from attempting to pass a weapon through the screening process by testing your alertness and the system’s ability to detect weapons.

If a person walks through the walk through metal detector and there was:

- No activation of the walk through metal detector, either visual or audible
- No activation of the handheld electronic metal detector
- You did not observe an object or have a reasonable suspicion that a person may be concealing a weapon

However, if it is noticeable the person did not remove all objects from their pockets; Department personnel shall instruct the person to remove the item(s). If the person refuses, and you do not believe the object to be a weapon, ask the person to leave. If the person refuses to remove the object(s) and refuses to leave, call for branch supervisor.

Common items not normally construed as a weapon, (i.e.... thick jewelry chains), could be considered a restricted item. Security personnel shall follow CSDM, 4-04/040.05 - Retention and Disposition of Restricted

Items.

Should any concerns arise, call for a branch supervisor to make the determination on the item.

If a person walks through the walk through metal detector and then flees out of the building and there was:

- No activation of the walk through metal detector, either visual or audible
- No activation of the handheld electronic metal detector
- You did not observe an object or have a reasonable suspicion that a person maybe concealing a weapon

Department personnel shall not pursue this individual or attempt to detain him/her for a weapons screening violation. Court security personnel shall notify the Branch Supervisor, as soon as possible.

Refer to Manual of Policies and Procedures relating to Foot Pursuits, also refer to CSDM, 4-03/025.10 - Foot Pursuit Policy For Security Personnel

Such right to withdraw their consent to search shall not apply to searches incident to arrest or otherwise being taken into custody, or any other circumstances authored by law which permits searches without a warrant.

If the person attempts to force entry into the courthouse without completing the screening process, they are subject to detention and/or arrest. Court security personnel shall notify the Branch Supervisor, as soon as possible.

• • 4-04/020.05 Search of Person and Property Entering the Courthouse

Inspection of hand-carried items are conducted using an x-ray device or by physical inspection of the item. If the x-ray displays an image of an explosive, incendiary, deadly or dangerous weapon, security personnel shall immediately advise their supervisor and appropriate action is to be taken. Notification should be accomplished as discreetly as possible. Security personnel shall maintain control of the item at all times, until the item has been cleared.

The search screening process consists of:

- Initial processing is conducted by security personnel using a walk-through metal detector. Prior to entering a walk-through metal detector, the person being screened is asked to remove all objects from their person, and then proceed through the metal detector. If the person being screened does not set off the alarm, either audibly or visually, the person is clear to proceed beyond the screening point. If the alarm is set off, the person must be reprocessed to determine the cause of the alarm prior to being cleared.
- Further screening is conducted by security personnel whenever individuals cannot be cleared after going through the metal detector a second time. A handheld metal detector is then used to determine and isolate the area of the individual that set off the alarm. Once isolated, a pat down search of their outer garments will be conducted.
- Pat Down searches should be done in an inoffensive, yet thorough manner and should be limited to the area of the individual's body which set off the alarm or prompts visual concern. The search is conducted

only to the extent necessary to ensure the absence/presence of a weapon. In the event security personnel are unable to locate and identify the object, or there is reasonable suspicion to believe a weapon may be concealed on the person, a supervisor shall be advised.

Note: These searches, as a condition of entry into public buildings are allowed under the regulations of the General Services Administration of the United States. These searches are administrative in nature for the purpose of keeping a facility free from weapons related violence. The search is legal so long as it is reasonable, no more intrusive than necessary, conducted for a purpose other than the gathering of incriminating evidence, and the subject consents. All County courthouses have signs posted which read: "All persons, packages, and briefcases are subject to search at any time." (This is a notion of "Implied Consent", and concludes that when individuals entering a public building, after passing a sign that notifies the public that persons entering the facility are subject to search, they may reasonably be deemed to have consented to the search. Any attempt to bypass the screening process is a violation of section 602(y) of the California Penal Code.

- Any items that are carried shall be x-rayed to ensure that there is no false bottom, concealed compartments, or weapons hidden in them. If the x-ray is suspicious or presents an inconclusive result, a hand search of the item is required and shall be conducted in an organized systematic manner. All sections of a bag, including zipper compartments, must be opened and inspected until the item is cleared.

Modified forms of screening may also be appropriate under certain circumstances. For example, tradesmen such as a carpenter, electrician, plumber, or other maintenance personnel should have a visual inspection of the tradesmen's tools. This should be done in a thorough yet unobtrusive manner. Independent contractors hired to perform contract work in the courthouses should be subject to the same procedures as the AOC and county maintenance personnel, except that contract maintenance personnel should be escorted and monitored by court or tenant staff, depending upon the location where the maintenance work is being performed.

Note - regarding property: Once a person offers an item to be examined by the x-ray device the search of that item shall be completed. The person may not withdraw consent to search the item once it has been offered.

• • 4-04/020.10 Screening a Person with a Disability

Security personnel shall process persons with medical or physical disabilities with respect and dignity. Persons entering security screening with mobility devices, such as (crutches, wheelchairs, and prosthetic aids) shall be individually screened.

Procedures for Screening Persons

When a search by metal detector is ineffective due to the presence of a mobility device, security personnel shall conduct a search with either a handheld metal detection device, a physical (pat-down) search, or a combination of the two. In doing so, security personnel shall escort the person through or around the screening point so a thorough search can be conducted. A person, subject to individual screening under this policy may:

- Request that a physical search (pat-down) be conducted by security personnel of the same gender, unless unusual circumstances dictate otherwise

- Request a private screening away from public view at any time, and if so requested, a second Deputy, Security Officer or Security Assistant should be present during a search conducted away from public view or
- Have a companion, assistant, or family member accompany him/her into the private screening area (once he or she has been screened) and remain throughout the screening process

When a search by metal detector or handheld metal detection device is precluded, security personnel shall immediately contact a supervisor. The screening shall proceed in the following manner:

- If a person with a mobility device can neither stand nor walk, security personnel shall conduct a pat-down screening of the person while seated
- If a person with a mobility device can stand but cannot walk, the person may stand or sit near his/her mobility device, and security personnel shall conduct a pat-down screening
- The person's hand-carried and removable items shall be screened in the usual manner

In conducting individual screenings of persons under this policy, security personnel:

- Shall ask the person if he/she has any difficulty raising his/her arms, remaining in the position required for a search using a handheld metal detection device or physical (pat-down) search, or any areas of the body that are painful when touched
- **Shall not ask persons to remove or lift any article of clothing that may reveal a sensitive body area**
- Shall accommodate a person if he/she needs a place to sit during the physical (pat-down) search or, while removing or putting on his/her shoes

No person shall be denied access to the courthouse solely because of the increased difficulty of screening his/her mobility device. If a supervisor determines that security personnel is unable to properly inspect the mobility device, the person shall be escorted to and from court business by Sheriff's Department personnel.

Procedures for Screening Mobility and Medical Devices

The following is a representative, but not exhaustive, list of devices that are permitted in the courthouse facility, but may require additional screening by security personnel:

- Wheelchairs
- Scooters
- Crutches
- Walkers
- Canes
- Prosthetic devices
- Personal oxygen concentrators or tanks
- Service animals
- Medications and associated supplies
- Braille note takers
- Diabetes-related medication, equipment, and supplies

These devices must be X-rayed if they can fit through the machine, including seat cushions and any non-

removable pouches or fanny packs. Any baskets or bags that normally hang from a walker must also go through the X-ray machine.

Medically-Prescribed Personal Transporters e.g. (Segways)

A person riding a medically-prescribed personal transporter e.g. (a Segway) may enter the courthouse. The person must provide credible assurance the device is used for a mobility disability. Credible assurance can be by verbal representation not contradicted by observable fact, or the presentation of a valid state issued disability card or parking placard. Security personnel shall consult a supervisor before prohibiting use of the personal transporter inside the court facility. Should the personal transporter be prohibited, security personnel shall offer the person with a mobility impairment a wheelchair, if available.

• • 4-04/020.15 Searching a Person with a Pacemaker or Other Medical Implant

With respect to cardiac pacemakers implants, stationary metal detectors in compliance with the National Institute of Law Enforcement and Criminal Justice Standards have not inhibited, improperly stimulated or interfered with the programming of pacemakers.

However, the hand-held style metal detectors and walk-through metal detectors such as those used at our facilities have the potential to activate medical implant devices. A person with a medical implant such as a Heart Defibrillator, Insulin Pump or Morphine Pump should not pass through a walk through detector or have a hand-wand detector used on them, as there is a slight chance of activating these devices. These persons should be hand searched. A person with a pacemaker, should have no adverse problem walking through a metal detector or having a hand-wand detector used on them, as pacemaker activation is not life threatening. A pat-down type search can be used anytime a person feels uncomfortable being searched using the walk through metal detector or having a hand wand used on them, such as those medical implant devices or due to pregnancy. All persons entering the courthouse will be searched.

• • 4-04/020.20 Refusal to Submit to Weapon Screening

• • 4-04/025.00 Peace Officers Entering a Courthouse

California Penal Code Section 171b authorizes the carrying of firearms, including other specified weapons, into a courthouse by a peace officer (active or retired) unless the officer is a party to the Court action. Violation of this section can be punished as a felony offense.

All peace officers (whether in uniform or civilian attire), must present their Department (picture) Identification upon entering the courthouse. Security personnel shall examine the picture identification, and shall ask the peace officer(s) the following question:

- “Are you here today on a personal matter or on official police business?”

If the peace officer (active or retired), is appearing on official police business direct him/her to:

- “Check in with the bailiff upon arrival in Court.”

If the peace officer (active or retired), is appearing as a party in any Court action, not arising out of official duties, it is prohibited for them to retain their weapon while taking care of their personal court business.

If the peace officer (active or retired), (except those appearing in an official police capacity), is attending any family law related matter (as a party in the action or a supporter to a party in the action) it is prohibited for them to retain their weapon while attending any family law court matter.

Weapons shall be secured in a designated gun locker or held in the Sheriff’s Office for safekeeping. The weapon will be returned upon the conclusion of the peace officer’s business in the Court building.

Refer to CSDM, 4-04/025.05 - Securing Peace Officer's Weapons Appearing on Personal Business.

Private Investigators, Body Guards and Bounty Hunters etc., are not peace officers. If they have a weapon, they must have a CCW (Carrying a Concealed Weapons Permit). The permit only authorizes them to carry a weapon, but they may not retain their weapon while conducting their court business. Their weapon must be secured in a designated gun locker or held in the Sheriff’s Office for safekeeping. If they do not have a pictured I.D. or a CCW with them; or if they have questions regarding securing their weapon, contact your supervisor immediately.

Weapons should only be secured in a vehicle as a last resort.

Once they have their weapon, they will be watched or escorted to the exit.

Supervisor’s Responsibility

Develop and adhere to a branch specific plan to ensure that peace officers attending court on personal business secure their weapons and cannot retrieve them until the conclusion of their business and are exiting the building.

• • 4-04/030.00 Security Searches of the Premises

On a daily basis, prior to the facility being opened to the public, an initial security search should be conducted. Security searches should be conducted during the day when appropriate. This procedure involves an exploration of all public accessible offices, rooms, closets, in addition to those areas that are limited access areas. These locations are checked for lost or misplaced articles, explosive devices, hidden weapons, or other unlawful materials left or planted in the courthouse or facility. Security personnel should be thorough and alert while carrying out this critical task.

Upon observing or finding a dangerous weapon, such as a gun or knife, the Security Officer and/or Security Assistant should secure the item, detain any potential suspect and immediately report the finding to a sworn Department member.

If a suspected explosive device is found, do not touch it. Immediately notify your supervisor verbally. Do not use radios or telephones.

• • 4-04/035.00 Supplement Searches in or at the Courtroom

Supplement searches at a courtroom entrance, will generally be ordered by a judge. These searches will usually be ordered on high profile or volatile cases. In conducting such authorized searches, court security personnel shall conduct searches with discretion and out of the general view of the public and other court participants, specifically jurors, when practical. In exercising their discretion, court security personnel may take into account such factors as the intrusiveness of the search, potential disruption of court proceedings, officer safety and the security needs of the court.

The Branch Supervisor shall be notified of the Court ordered search and will work with the security personnel to set up the least obtrusive search possible.
