ACADEMY STAFF CODE OF CONDUCT

The purpose of Academy training is to teach the basics of law enforcement and enhance each recruit's character development so graduating recruits will know what is right and will do the right thing. Staff must encourage and develop recruits to look beyond their own self interests.

The staff and instructors must emphasize the development of character in each recruit. The goal is only attainable in an environment of trust, choice and reasonableness. The environment must be conducive to learning and allow the recruit to grow strong physically and emotionally.

Academy staff and instructors shall adhere to the following code of conduct:

Embrace and implement leadership, blend the Department's Core Values and Mission Statement into the lesson plan, and embody the philosophies and expectations of the Training Bureau. Negative references about the Department, other employees and/or one's own personal opinions which are contrary to the Department's objectives during recruit lectures are prohibited.

Commit to an environment that promotes learning, trust, and a climate that allows each recruit to be the best they can be. Personal ridicule without a direct nexus to a specific learning domain is strictly prohibited.

Teach ethics by being a worthy role model and by helping recruits to reason clearly about what is right and wrong.

Practise and teach ethical values such as respect for life and liberty, responsibility, honesty, fairness, tolerance, courtesy, self-discipline, integrity, kindness, compassion, courage, and accountability for one's actions.

Help recruits learn about and understand the different customs, attitudes, and lifestyles of the varied communities we serve.

Encourage the development of empathy; looking beyond individual biases and responding to fellow human beings on a personal, respectful level.

Raise the level of a recruit's self-esteem. With high self-esteem, they are more resistant to improper peer pressure and better able to follow their own judgement.

Practise and teach recruits to be self-managed. Model and teach personal leadership skills.

Assist the recruits in developing a strong will. Teach the importance of keeping emotion under control and to

see and think through the ethical dimensions of a situation. It takes will to resist temptation and stand up to improper peer pressure.

At no time will an instructor stress a recruit solely for their own satisfaction. There shall never be negative references made toward a recruit's family members. Such behavior is grounds for removal from Academy instruction.

LOS ANGELES COUNTY SHERIFF'S ACADEMY

RECRUIT CODE OF CONDUCT

As an Academy recruit, you are entitled to be treated with respect and dignity regardless of age, race, gender, physical disability, religion, marital status, sexual orientation or national origin. You are also entitled to an environment that is not demeaning or hostile. Behavior which detracts from the dignity or self-esteem of others will not be tolerated. Respect the rights of others. Your relationships with other recruits, staff, and civilian personnel, on or off Academy grounds shall be professional. Your conduct at all times reflects not only on yourself, but on this Academy, the Department and all of law enforcement.

All recruits shall adhere to the following code of conduct:

Abide by the ethical principles reflected in the Constitution and the Department's Core Values and Mission Statement. Resist any tendency to focus on self-serving **self-serving** desires, and do not take advantage of situations for personal satisfaction.

Be ethical in actions, words and deeds. Work and live by ethical conduct. Respect human life and liberty. Be honest, fair and tolerant of other differences. Couple courage with compassion and self-control.

Practice integrity. If you make a decision later determined to be incorrect, admit to the error regardless of the consequences. Take responsibility and stand accountable for your actions.

Be courageous both physically and ethically. Physical courage requires you to take appropriate action despite the possibility of physical harm. Ethical courage requires you to do what you know to be right even in the face of resistance or improper peer pressure.

Commit to excellence. Give your all in everything you do. Do not judge yourself by comparison to others but by your own sense of self-esteem and personal accomplishment.

Be decisive. Make decisions based on what is ethically right, not on your own personal desires. Be responsible to those that need your help.

Be honest. Never lie, cheat or tolerate among you another recruit who does.

Respect the Academy and its staff, the Department and its history, and the profession of law enforcement as a whole.

In most cases, recruits are to follow the chain of command and deal with their respective Recruit Training Officer. A. Reasons for Counseling - Recruit's personal problems, advice or suggestions that Recruit Training Officers are authorized to give, or an inquiry a recruit wishes to make regarding his/her Academy progress, standing in class, career direction, problems encountered, etc.

GENERAL CONDUCT

Recruits shall not gather in doorways, aisles or other thoroughfares and shall not impede the progress of staff members or other persons walking about the Academy grounds.

- A. When any staff member, uniformed officer or other person not a recruit (excluding inmate workers or work furloughs) approaches a recruit or group of recruits, those recruits shall stand so as to make a clear path for the person. If the recruits are standing in a group and are unaware of the approaching person, the first recruit to see him/her shall announce "STAND CLEAR" and the other recruits in the group shall then stand aside and out of the way of the approaching person.

- B. If a recruit wishes to walk passed any person (as mentioned above) within close proximity, the recruit closest to that person shall request permission by stating "Sir/Ma'am, by your leave, sir/ma'am".

- C. When a recruit's name is called, it is the responsibility of the class to insure that the recruit is advised that a staff instructor wishes to see him/her. This could be achieved by loudly repeating the recruit's name. The recruit closest to the locker room, restroom or outside doors will call the name in those respective places. The recruit called will then report to the Recruit Training Officer who called him/her.

- D. Every recruit will have a complete Class "B" uniform and appropriate civilian attire available at all times on the facility.

- E. Recruits will not have their uniform, or any other police equipment visible in their

private vehicle either on their person or hanging in their vehicles.

F. Recruits shall not wear their uniform or any other law enforcement equipment while off duty. In addition, recruits shall not identify themselves as a law enforcement officer.

G. Recruits will not loiter in the vicinity of the Academy (5 mile radius). It is the Training Bureau's goal to not be intrusive or disturb the peace of the surrounding neighborhood. Therefore it is recommended that you go straight home from the Academy. Exception to this rule is strictly with the permission of a staff instructor.

ACADEMIC PROGRAM

This program is designed to increase the academic averages of the recruits and to enhance the learning process during your Academy training. Each examination has a minimum passing score (cut-score) established by POST. Recruits must pass each examination by the cut-score in the primary and re-test. If a recruit fails both, he/she will be separated from the Academy.

A. Recruits who do not achieve the cut-score will review and discuss the primary exam (remediation) with the Testing Staff Instructor in an effort to help the recruit achieve the cut-score.

B. Within a few days after the review session the recruit will take the re-test.

1. The re-test covers the same topic as the primary test but with different questions.

TEST AND STUDY GUIDE

A. Why Study - It is of the utmost importance that you acquire not only basic police knowledge, but also learn problem solving techniques and develop habits that will be vital to your professional growth.

B. How Long to Study - This depends upon how much material you have to study and how much time you have available. It is impossible to set a time limit that will prove satisfactory to each and every recruit. Depending upon the examination results, recruits may find that more study time is necessary or that too much time was spent on a given subject.

C. How to Study Effectively - You must have a planned approach to study. Budget your time, organize the material and make an effort to eliminate outside distractions. Plan to work in terms of one and one-half to two hour blocks of concentrated effort. Plan your study environment so that you are as comfortable as possible to encourage continuity of thought and concentration.

D. Study Techniques - There are techniques which will increase your learning efficiency. For example, once you sit down to study, GET STARTED. Start by surveying what you intend to accomplish during this particular study period. Glance through all of the material, noting particularly any questions to be answered. Pick out the more difficult material to study. Proceed methodically and systematically.

1. Ask yourself questions about topic headings so that you read with a purpose.
2. Read with an active search for information.
3. Use memory aids or devices (flash cards, highlighting, etc.)
4. After you have read something, briefly recite high points in a condensed form so you are sure you know what you just read. Think of how the material may be used in future situations and relate it to what you have learned before.

5. Review the lesson as a whole unit. Look back over your reading notes and underlining. It has been found that more is forgotten in one day when study is not followed by review than is forgotten in two months when retention is aided by prompt and continuing review.

E. Preparing for examination - Preparing for examinations is a matter of vital importance to all students. Unfortunately, it is the only time when some students study, and their last minute efforts are hurried and superficial. A good student is not apprehensive about exams because he/she realizes that they serve the following purposes:

1. To motivate and stimulate learning
2. To provide practice in applying things learned
3. To indicate student progress
4. To emphasize important points
5. To serve as a basis for grades

F. Review Often and Intelligently - Review new material as soon as you have completed studying it. Review old material before going on to new material. Don't put off studying for exams. Study with other recruits and pool your information in the form of group discussions. Memorize only where it is necessary and don't be afraid to seek help. Your Recruit Training Officer is available at all times.

G. Taking Examinations

1. Take examinations in stride and assume the correct mental attitude. Don't worry about how well you will do, just do your best. Don't read into questions, but above all, read the question thoroughly and accurately.
2. Glance through the entire test to determine the general type of questions.
3. Work vigorously and concentrate.
4. Budget time. Adequate time will be given to complete the examination, but use the time wisely. Don't spend too much time on difficult questions. Check the question and go on with the test, coming back to the skipped question after you have completed the test.

CHEATING

Cheating on any portion of the Academy training curriculum shall not be tolerated and shall be grounds for immediate termination.

- A. Cheating Defined - To defraud, mislead, deceive or act dishonestly.
- B. Examples of cheating include, but are not limited to: copying answers from another's paper or allowing someone to copy your answers; not accurately recording test results/scores; any deceptive behavior that would give an individual an unfair or unethical advantage over other recruits.

TECHNOLOGY AND SOCIAL MEDIA

Technology and social media platforms are growing. Although they impact our way of life, there is still a time and place for them. In order to maintain a safer training environment and to instill practices already implemented within our Department and other police agencies, you shall abide by the following:

- A. Smart watches, cellular phones, or any other device that has the ability to record or store data is prohibited unless approved permission is obtained by the staff.

- B. The usage of social media sites depicting any correlation with the Department or Academy may be grounds for dismissal/separation. This may include but is not limited to:
 - 1. Posting of pictures of one's self in uniform

 - 2. Posting of pictures depicting the LASD badge and/or firearms

 - 3. Posting comments about the Academy, the Department, or its members

class. If the Copy Recruit is absent, it will be the duty of the class sergeant to appoint another.

H. In the absence of staff instructors, the class sergeant is in charge of the class. The class sergeant shall maintain control over the class so as to be a credit to this Academy's training and his/her department.

I. In the event that the class sergeant is absent, the first platoon sergeant will assume the duties of class sergeant and the first squad leader will assume the duties of first platoon sergeant.

J. It shall be the class sergeant's responsibility to insure that all platoon sergeants become familiar with class sergeant duties.

K. At the conclusion of the training day, the class sergeant will inform the class of the starting time and location for the next training day. The information shall include the uniform to be worn and any other pertinent information.

MORNING REPORT

C. The morning report must be signed by the class sergeant.

BREAKS

The class sergeant will ascertain the number of minutes the lecturer or Recruit Training Officer desires the class to take during the break and advise the class in a clear and professional manner.

A. It will be the responsibility of the break recruits to report to their staff and inform them of the length of the break and inquire if the staff needs any recruit (ex. "Sir/Ma'am, Recruit _____ <Agency> advising Class # _____ is on a 10 minute break. Is there anyone you wish to speak to, sir/ma'am?")

B. Two minutes prior to the end of the break, the class sergeant will warn the class members that the break is over.

C. The class will return to their respective desks and be prepared to give the instructor their undivided attention.

D. Breaks may be utilized for remedial instruction and practice if the class is experiencing difficulty in any area of training.

FLAG DETAIL

It will be the privilege of the senior class to raise and lower the colors at the beginning and end of each day. In the absence of the senior class, the junior class will assume the privilege. A recruit on flag detail will be assigned as flag detail commander who will take command of the detail during flag ceremonies and arrange for alternates if a detail member is absent.

A. Raising the Flags - The flag detail will fall out of the morning class formation and obtain the flags from the staff office in the "D" building. They will march in a military formation to the flag pole, located north of the Grinder, at which time the flags will be attached and raised slightly off the ground. The flag detail commander will command "ATTENTION TO COLORS" (this is to advise everyone in the immediate area that the flags are about to be raised). The commander will then command "PRESENT ARMS." When the commander salutes, the flags will then be raised to the top of the flag pole. The flag detail commander will then give the command "ORDER ARMS" (pause) "CARRY ON."

B. Lowering the Flags - Before being dismissed for the day, the flag detail will march to the flag pole where the detail commander will command "ATTENTION TO COLORS" (this is to advise everyone in the immediate area that the flags are about to be lowered). The commander will then command "PRESENT ARMS." The flags will be lowered, after which the detail commander will command "ORDER ARMS" (pause) "CARRY ON." The flags will be properly folded, and the detail will march back to the staff office in the "D" building where the flags will be secured.

C. Half Staff - If the flags are to fly at HALF STAFF, they will first be raised to the top of the flag pole and then lowered slowly to half-staff. Upon lowering the flags at the end of the day, they will first be raised to the top of the flag pole and then lowered.

D. When marching with the flags either to or from the "D" building, the recruit carrying the flags will always exit or enter the building first.

E. If the flag detail is marching towards a recruit(s) and they are not carrying the flags, the recruit(s) will make a path and allow the flag detail to complete their duties. If the flag detail is carrying the flags, the recruit(s) will come to attention and allow the flag detail to pass by.

F. All recruits who are in the immediate area when the flag detail commander commands "ATTENTION TO COLORS" will stop whatever they are doing and face the flag pole. If the recruit is in business attire he/she will put their right hand over their heart or if the recruit is in uniform he/she will salute with their right hand at the command of "PRESENT ARMS."

DRILL, CEREMONIES, FORMATIONS AND INSPECTIONS

“FAILING TO PREPARE IS PREPARING TO FAIL”

DRILL AND CEREMONIES

This section presents principles and techniques for Los Angeles County Sheriff's Department drill and ceremonies. The objective is to develop a command voice and individual and unit pride.

A. Drill consists of certain precision movements by which a unit is moved in an orderly manner, from one formation to another, or from one place to another. Each member of the unit does his/her part with exactness, so that on command the formation moves instantly, smartly and smoothly. The members of the class are trained to stand, step off, march, halt and to handle their service weapon smoothly as individuals and in unison as members of the formation.

DRILL COMMANDS

A drill command is an oral order from a unit leader. The leader gives all the commands to his/her unit. Most drill commands have two parts: 1) the preparatory command and 2) the command of execution. Neither of these parts are actually a command by itself, but together they complete one order which obtains the desired response from the formation.

The preparatory command states the movement or formation to be carried out and mentally prepares

the individual for its execution. Example: In the command “**FORWARD, MARCH**”, the preparatory command is **FORWARD**. The command of execution tells when the movement is to be carried out. In “**FORWARD, MARCH**”, the command of execution is **MARCH**.

In some commands, the preparatory command and the command of execution are combined, for example: “**FALL IN**”, “**AT EASE**”, and “**REST**”. These commands are given without inflection and at a uniformly high pitch and loudness comparable to that of a normal command of execution. In some instances there may not be a preparatory command, such as in commanding the class to “**SEAT**”. In these instances the word “**CLASS**” will be used; i.e., “**CLASS, SEATS**” or “**CLASS, HALT**”.

This supplemental preparatory command is not always necessary, such as in “**CLASS, FORWARD MARCH**” as “**FORWARD**” is the preparatory command. The unit leader or class sergeant faces the formation when giving commands.

To revoke a preparatory command that he/she has given, the unit leader gives the command “**AS YOU WERE.**” This instructs the persons commanded to return to whatever they were doing prior to the initial command.

— **VOICE CONTROL**

The loudness of a command is adjusted to the number of recruits in the formation. Normally, the unit leader or class sergeant places himself/herself centered on the unit. He/she speaks while facing his/her unit so that his/her voice reaches all the recruits.

INFLECTION

Inflection is the rise and fall in pitch of the voice. When giving a preparatory command it should be delivered in a sharper tone and in a slightly higher pitch than the last syllable of the command of execution. It must have plenty of snap. The best way to develop a command voice is to practice commands.

In some commands, such as "**FALL IN**" and "**FALL OUT**" the preparatory command and command of execution are combined. Give these commands without inflection and a uniformly high pitch and loudness comparable to that for a normal command of execution.

SNAP

Snap is that extra quality in a command that demands immediate response. It expresses confidence, alertness, decisiveness and complete control of yourself and the situation.

CADENCE

Cadence in commands means a uniform and rhythmic flow of words, the interval between commands is generally of uniform length for any given unit. This is necessary so that everyone in the formation will be able to understand the preparatory command and will know when to expect the command of execution. For the unit while marching, the best interval of time is that which allows one step to be taken between the preparatory command and the command of execution. For example:

one	two	three
CLASS		HALT

The same interval is best for commands given at the Halt. For example:

one	two	three
-----	-----	-------

RIGHT

FACE

Longer commands, such as “**BY THE RIGHT FLANK, MARCH**” must be started so the preparatory command will end on the proper foot and leave a full count between the preparatory command and the command of execution.

POSITION OF ATTENTION

A. To come to attention, bring your heels together on the same line.

B. Turn your feet out equally forming an angle of 45 degrees.

C. Keep your legs straight without stiffening or locking your knees.

D. Hold your body erect with your hips level, chest lifted and arched, your shoulders square and even.

-

-

E. Let your arms hang straight without stiffness along your sides, with the palms of your hands turned inward, your fingers curled so that the tips of your fingers touch the palms of your hands. Keep your thumbs along the seams of your trousers.

F. Keep your head erect and hold it squarely to the front with your chin drawn in so that the axis of your head and neck are vertical. Look straight to the front.

G. Rest the weight of your body equally on the heels and the balls of your feet.

!

REST AT THE HALT

At the command "**PARADE, REST**" move your left foot 12 inches to the left of your right foot. Keep your legs straight so the weight of your body rests equally on the heels and the balls of your feet. At the same time, place your arms behind your back with your hands extended and joined, interlocking your thumbs so that the palm of your right hand is outward. Hold your head and eyes at the position of attention. Remain silent and do not move.

At the command "**AT EASE**", keep your right foot in place. You may talk and move.

- "**AT EASE**" may be commanded from the position of attention or parade rest.

In resuming the position of attention from at ease take the position of parade rest at the preparatory command of **“SQUAD”**, **“PLATOON”**, **“DETAIL”** or **“CLASS.”** At the command **“ATTENTION”**, assume that position.

At the command **“FALL OUT”**, given from attention only, you may leave your position in the formation but remain in the immediate are. Resume your former place in the formation at the position of attention on the command **“FALL IN”**.

FACING RIGHT AT THE HALT

The command is **“RIGHT FACE”**. This is a two-count movement. The preparatory command is **“RIGHT”**. The command of execution is **“FACE”**.

At the command **“FACE”**, slightly raise your left heel and right toe and turn 90 degrees to the right, pivoting on your right heel, assisted by a slight pressure on the ball of your left foot for the first count. Then come to attention for the second count. Hold your arms as if you were at attention when executing this movement.

FACING LEFT AT THE HALT

The command is **“LEFT FACE”**. This is a two-count movement. The preparatory command is **“LEFT”**. The command of execution is **“FACE”**.

At the command **“FACE”** slightly raise your right heel and left toe and turn 90 degrees to the left, pivoting on your left heel, assisted by a slight pressure on the ball of your right foot for the first count. Then come to attention for the second count. Hold your arms as if you were at attention when executing this movement.

FACE TO THE REAR

The command is "**ABOUT FACE**". At the command "**FACE**" move the toe of your right foot back to a position touching the ground one-half the length of your foot to the rear and slightly to the left of your left heel. Raise your left toe and spin 180 degrees to the right, pivoting on the left heel and right toe. When you come to a half, you will be standing at attention with your feet spread at a 45 degree angle. Hold your arms at attention when exercising this movement.

HAND SALUTE OR PRESENT ARMS

The command is "**PRESENT ARMS**". On the command "**ARMS**" raise your right hand and arm in the most direct manner until the tip of your middle finger touches your right eyebrow. Keep your fingers and thumb extended and joined, your forearm, wrist and hand straight, and your upper arm horizontal. This type of salute is only done when in uniform otherwise you place your right hand over your heart. On the command, "**ORDER ARMS**" drop your right hand in the most direct manner to your side as in the position of attention.

MARCHING

When executed from a halt, all steps and marching, except right step, begin with the left foot. For movements involving a turn while marching, the command of execution is given on the foot in the direction of the turn.

MARCHING WITH A THIRTY-INCH STEP AT QUICK TIME

To march with a thirty-inch step in the cadence of quick time of normal marching, the command is **“FORWARD MARCH”**. At the command **“FORWARD”**, shift the weight of your body to your right leg without noticeable movement. At the command **“MARCH”** step off with your left foot and march straight forward with 30 inch steps without stiffness or exaggerating your movements. Swing your arms easily in the natural arcs, six inches straight to the front and three inches to the rear of the seams of your trousers. Keep your arms straight without stiffness, your fingers curled as in the position of attention and just clearing your trousers when swinging.

To halt from quick time, the command is **“SQUAD”**, **“PLATOON”**, **“DETAIL”**, or **“CLASS, HALT”**, given as either foot strikes the ground. At the command of execution, take one more step and then bring your rear foot alongside the stationary foot as in the position of attention, halting in two counts.

MARCHING WITH A FIFTEEN-INCH STEP (HALF STEP)

To march with a fifteen-inch step, the command **“HALF STEP, MARCH”** is given on either foot and only while marching at quick time. At the command **“MARCH”** take one more 30-inch step, and then take 15-inch steps in the cadence of quick time. Allow your arms to swing naturally.

To resume the 30-inch step, the command **“FORWARD, MARCH”** is given as either foot strikes the ground. At the command of execution, take one more 15-inch step, and then step off with a full 30-inch step.

MARCHING IN PLACE

To march in place at quick time, the command **“MARK TIME, MARCH”** is given as either foot strikes the ground while marching at quick time or at half steps.

When marching at quick time or half step, and the command **“MARK TIME, MARCH”** is given, take one more step after the command of execution, plant the trailing foot alongside your stationary foot and march in place. Raise each foot alternately, approximately two inches off the ground, executing the movement in quick time. Allow your arms to swing naturally.

The command "**FORWARD, MARCH**" is given to resume marching with the 30-inch step. Take one more step in place and then step off with a full step. This command is given as either foot strikes the ground.

The halt from mark time is executed similarly to the halt from quick time.

-

-

MARCH TO THE RIGHT OR LEFT (12-INCH STEP)

The command "**RIGHT STEP, MARCH**" is given only from the halt. On the command "**MARCH**" slightly bend your right knee and raise your right leg only enough to allow freedom of movement. Place your right foot 12-inches to the right of the left foot and then move the left foot, keeping your left leg straight to a position alongside the right foot as in the position of attention. Continue this movement in the cadence of quick time, keeping your arms by your sides until the command "**HALT**" is given.

To "**HALT**" from the right or left step, the preparatory command is given when the heels are together, and the command of execution (**HALT**) when the heels are together the next time. The halt from the right or left step is executed in two counts. On the command "**HALT**" take one more step with your right foot and place your left foot alongside the right, in the position of attention. Reverse the procedure for left step.

TO MARCH IN THE OPPOSITE DIRECTION

The command "**TO THE REAR MARCH**" is given as the right foot strikes the ground and only while marching at quick time.

At the command of execution, take one more step with your left foot, pivot on the balls of both feet, turning 180 degrees to the right and step off with the left foot in the new direction. The pivot takes a full count. Hold your arms at your sides while executing the movement.

TO CHANGE STEPS

The command "**CHANGE STEP, MARCH**" is given as the right foot strikes the ground, while marching at quick time.

At the command of execution, take one more step with your left foot, then in one count, place your right toe near the heel of your left foot (the result is one skip) and step off again with your left foot.

-
-
-

COLUMN MOVEMENTS FROM A HALT

The command "**COLUMN RIGHT, MARCH**" from a halt is executed by stepping off one pace with the left foot and pivoting to the right on the ball of the left foot and step off in the indicated direction with your right foot, execute the pivot and the step in one count and continue marching in the new direction.

The command "**COLUMN LEFT, MARCH**" from a halt is executed by stepping with the left foot, followed by a 30-inch step with the right foot. Then pivoting to the left on the ball of the right foot, step off in the indicated direction with the left foot.

!

COLUMN MOVEMENTS FROM A MARCH

The command is “**COLUMN RIGHT (COLUMN LEFT, COLUMN HALF-RIGHT, OR COLUMN HALF-LEFT), MARCH**”. The base element during the turn is the squad on the flank in the direction of the turn. The pivot man for the movement is the first man in the base squad.

When marching, the command of execution is given on the foot in the direction of the turn. At the command “**MARCH**” the pivot man faces to the right (left) in marching and steps out one full step with his/her right (left) foot in the direction of the turn. Then he/she half steps. When other members of his/her rank are abreast, he/she resumes the full step. Other members of the leading rank, twice oblique to the right (left) without changing interval and place themselves abreast of the pivot man and conform to his/her step. They execute the first oblique at the command of execution. The second oblique is executed when opposite their new line of march so that when the oblique is completed they will be marching toward the new front with proper interval. Ranks in rear of the leading rank execute the movement on the same ground and in the same way as the heading rank.

DOUBLE TIME THIRTY-SIX INCH STEPS (RUNNING)

The command “**DOUBLE TIME, MARCH**” is given from a halt or as either foot strikes the ground while marching in quick time.

When double time is given from a halt, shift the weight of your body to your right leg without noticeable movement. At the command “**MARCH**” raise your forearms to a horizontal position with your fingers and thumbs closed, knuckles out and step off with your left foot. Continue to march with 36-inch steps in an easy jog at the cadence of double time. Let your arms swing naturally straight to the front and rear, but keep your forearms horizontal.

When marching at quick time and the command “**DOUBLE TIME, MARCH**” is given, take one more 30-inch step and step off with your trailing foot in double time as instructed above.

To resume quick time from double time, the command “**QUICK TIME, MARCH**” is given as either foot strikes the ground. At the command of execution, take two more steps then resume quick time, dropping your arms to your sides.

To halt from marching double time, at the command of execution "**HALT**" take two more double time steps, then drop your arms and halt in two counts in the cadence of quick time.

ROUTE STEP

The command "**ROUTE STEP, MARCH**" is given at either quick time or double time and is commanded when marching in cadence is not practical due to rough terrain or other circumstances. Prescribed intervals and distances will be maintained.

FORMATIONS

Every morning the class will fall into formation on the grinder for the morning report. Unless otherwise dictated by the training schedule for the day, the class will fall into a PLATOON FORMATION.

A. PLATOON FORMATION

1. Each platoon will have 4 squads (rows).

a. Each squad leader (the recruit furthest to the right) will be the tallest recruit in his/her squad with the first squad leader being the tallest.

- The distance between squads is determined by the 2nd, 3rd and 4th
- squad leaders extending their right arm forward, fingers joined and
- extended, palm down. The fingertips of the squad leader should
- just touch the back of the squad leader in front of them. The first
- squad leader is the base element of the formation.

b. The platoon should descend from tallest to shortest recruit from right to left with the first squad being the tallest recruit in his/her rank (column). **NOTE: every recruit should be taller than the recruit behind them and to the left of them.**

_____ c. The interval (distance from shoulder to shoulder) is determined by each recruit, except the recruit furthest left (LEFT FLANK) of each squad, places their left hand on his/her left hip with the elbow in line with their body (rest the heel of the palm on the hip with fingers extended, joined and pointed down).

Each recruit,
right and aligns
arm touches
interval is

except the squad leader, turns his/her head to the
himself/herself (using side shuffle steps) so their right
the elbow of the recruit to his/her right. Once the
determined return to the position of attention.

1. This is considered CLOSE INTERVAL.

2. Platoon sergeants are positioned three (3) paces forward, centered and
facing away from the platoon once the platoon is at the position of
attention.

3. There shall be three (3) paces separating each platoon. First
squad leader of each platoon paces the interval from the last person in the first squad of
the platoon to his/her right. The first squad leader of the first platoon is the base element
for the entire formation.

4. Class sergeant is positioned six (6) paces forward, centered and

facing the class.

5. Guidon (if applicable) is positioned approximately one (1) pace to the rear of and approximately 30 inches left of the class sergeant.

B. PHYSICAL TRAINING (PT) / DEFENSIVE TACTICS (DT) FORMATION

This formation will be used on the grinder or on the PT field for stretching and/or calisthenics or in the gymnasium for DT instructions.

1. Each platoon will be in two (2) columns.
2. Tallest recruits in the front descending down to shortest recruits in the rear of each column.
3. The platoon sergeant takes the first position of the first column (from right to left) regardless of height.
4. The interval between ALL columns is two (2) paces from the column to the right and two (2) paces to the rear of the recruit in front. The first platoon sergeant is the base element of this formation.
5. The class sergeant is forward, centered and facing the class.

-

C. MARCHING FORMATION

1. This formation will consist of the entire class in four (4) columns. The column furthest to the right is the 4th squad and the base element. The formation aligns and covers based on this element.

a. Align - making sure your shoulders are abreast and in line with the shoulders of the recruit to your right.

b. Cover - making sure you are directly behind the recruit in front of you.

2. The first recruit in each of these columns is designated as the squad leader.

Squads are numbered 1-4 from left to right.

3. The rest of the class fills in behind the four squad leaders in tallest to shortest descending order from left to right. **NOTE: every recruit should be taller than the recruit behind them and the recruit to their right.**

4. The distance between recruits (back to chest) should be 40 inches throughout the formation.

5. The class is at the position of attention while in formation waiting for direction from the unit leader.

6. When marching the class, the unit leader will center himself/herself six paces from the left side of the formation.

D. RUNNING FORMATION

1. The same as marching formation but in reverse. The shortest recruit in the

~~-class is the leader~~ class is the leader of column one ascending to the tallest recruits at the rear of the formation.

INSPECTION

Inspection is used to instill pride in the recruits as individuals and as a platoon. Throughout the Academy training program the staff will conduct random inspections to ensure the recruit's uniform appearance, grooming standards and weapon manipulation is in accordance with Department guidelines.

A. While in platoon formation the Executive Recruit Training Officer will advise the class sergeant "**PREPARE FOR INSPECTION**". The class sergeant will take two steps

forward, execute an about face and command “**PLATOON SERGEANTS, PREPARE YOUR PLATOONS FOR INSPECTION**”.

B. On command, platoon sergeants will take two (2) steps forward, execute an about face and command in platoon order (1st platoon, 2nd platoon, 3rd platoon,...etc.), “# _____ **PLATOON OPEN RANKS, MARCH**”

C. On command “MARCH,” the **first squad** of the platoon will take two (2) 30-inch steps forward. The **second squad** will take one (1) 30-inch step forward. The **third squad** will stand fast and the **fourth squad** will take two (2) fifteen-inch steps to the rear (leading with the left foot). All squads will come to CLOSE INTERVAL, DRESS RIGHT DRESS after taking their respective steps.

D. The platoon sergeant will verify the alignment of the platoon by sighting down each squad from the squad leaders side of the formation (RIGHT FLANK). He/she will do so with sharp facing movements.

1. If the platoon sergeant needs to align a recruit in the formation he/she will

do so as follows:

Ex. **“FIRST SQUAD RECRUIT _____ MOVE FORWARD A HALF STEP”**

2. After alignment verification the platoon sergeant marches three (3) paces in front of the first squad leader, halts, faces left and commands “# _____ **PLATOON, READY, FRONT**”, at which point platoon members lower their arms and face head and eyes to the front. The platoon sergeant follows with the command “**COVER**” at which point members of the 2nd, 3rd, and 4th squads cover down directly behind the person in front of them.

3. Upon commanding the platoon, the platoon sergeant immediately takes two (2) paces forward, halts and executes a right face, (the platoon sergeant shall be three (3) paces in front of the first squad leader).

E. When all platoons are ready for the inspection the class sergeant will face about and report to the Executive Recruit Training Officer “**SIR/MA’AM CLASS # _____, STANDING BY FOR INSPECTION, SIR/MA’AM**”. The Executive Recruit Training Officer will inspect the class sergeant.

F. At this time, the platoon staff instructors will approach the platoon sergeants. The platoon sergeant will report “**SIR/MA’AM # _____ PLATOON IS STANDING BY FOR INSPECTION, SIR/MA’AM**”.

G. After inspecting the platoon sergeant, the staff instructor will direct the platoon sergeant to accompany him/her while inspecting the platoon and record all information relative to the inspection.

1. When asked a question during inspection, the recruit will repeat the question in the form of a statement prior to giving the answer.

Ex. "SIR/MA'AM, THE ELEMENTS OF BURGLARY ARE ____"

Ex. "SIR/MA'AM, THE SERIAL NUMBER OF MY WEAPONS IS _____"

H. Upon the completion of the class inspection, the class sergeant will bring the class to attention (if needed) and command "**CLASS # _____, CLOSE RANKS, MARCH**"

I. Upon command, the first squad of each platoon will stand fast. The 2nd, 3rd, & 4th squads will take one, two or three 30-inch steps forward respectively.

WEAPONS INSPECTION

May be executed one squad at a time, by platoons or en masse. Ensure there is no magazine in the magazine well prior to executing the command. This can safely be done, if needed, while the firearm is secured in the holster by simply pressing the magazine release button. The command is "INSPECTION, (pause) ARMS". It involves several movements which are executed quickly and smoothly. It shall be executed only when halted at the position of attention with weapon in holster.

A. At the preparatory command, "INSPECTION", the recruit will unstrap their holster strap and grasp the butt of their weapon with their gun hand. DO NOT REMOVE THE WEAPON FROM THE HOLSTER.

! |

B. At the command of execution, "**ARMS**", draw the weapon from the holster and raise your gun, gun barrel approximately 6" from you chin and pointing 45 degrees to your non-gun side. KEEP YOUR FINGER OFF THE TRIGGER.

!

!

C. Without moving the muzzle in any other direction, grasp the slide with the thumb and fingers of your non-gun hand and lock the slide to the rear. Drop the non-gun hand back to the position of attention.

!

D. If magazines are in the magazine pouches, with your non-gun hand, unsecure the snaps and remove the magazines. Manipulate in a manner that the open ports of the magazines are facing upward.

RANGE RULES AND PROCEDURES

A. The designated range officer at any Sheriff's range facility will enforce all rules and regulations concerning range operations.

B. Use of Sheriff's range facilities is a privilege, subject to withdrawal for failure to adhere to safety procedures or administrative controls.

C. All personnel entering a Sheriff's range facility shall carry all firearms in a safe manner, adhering to the following:

1. Auto loader pistols shall be carried either holstered or with the slide locked in the rear position and the magazine carried separately.

2. Special weapons, such as shotguns or rifles, shall be carried with the action opened when possible and all magazines or clips removed.

D. Classroom decorum and demeanor shall be maintained. When on or off the firing line, recruits shall speak softly.

E. The firing line shall not be entered until a target has been assigned.

F. Only those firearms designated as official sidearms of the shooters' law enforcement agency shall be permitted.

G. The hammer shall be cocked or the slide mechanism activated only when the weapon is pointed at the target. In no case shall the weapon be cocked while resting on the bench (BC range only).

H. Shooters shall not rest against the bench (BC range only) while firing.

I. When leaving the firing line, the weapon shall be carried in the manner set forth in item C above.

J. The range officer may inspect any weapon or type of ammunition to ensure conformance to safety standards. The final determination as to the use of any weapon or type of ammunition rests with the range officer.

K. Sheriff's Department reloads or brass, in any quantity, shall not be removed from the range.

L. All firing shall be upon official targets supplied and/or approved by the range sergeant.

M. In case of misfire or malfunction, notify the range officer by raising your non gun hand while keeping the firearm pointed toward the target at all times.

N. The shooting card shall be properly filled out. The Academy's policy on cheating, as described in chapter I, applies at the range also.

-

——RANGE TERMINOLOGY

1. Blade yourself to the target— This action means that you turn away from or

sideways to your target by 90 degrees. In this manner a right handed shooter would have their left shoulder closest to the target and their right shoulder farthest away from the target. Left handed shooters would be just the opposite. During this action the weapon is kept on safe with the muzzle pointed down range in front of the shooters chest or stomach area. The purpose of blading one's self to the target is to enable the shooter to lock the slide to the rear in a safe manner.

2. De-cock— The deliberate action of rotating the safety lever both down and up.

This function safely drops the hammer which is cocked and in single action and brings the weapon back to a double action firing mode.

3. Drop your magazine to the ground— - --This is the action of pressing the magazine release button and allowing the magazine to fall freely to the ground. This command is often given at the end of a shooting course and is used to clear potential live rounds from the weapon.

4. Dummy rounds or snap caps— - --These items are replica bullets that are inert. These items are used for training purposes such as dry fire practice with the weapon or to skip load the magazine. Snap caps also protect the firing pin from being damaged whereas dummy rounds do not.

5. Dry fire practice— - This type of practice is used for the recruit to get a feel for the trigger. Typically when dry fire practicing, a snap cap is placed in the weapon in order to protect the firing pin.

6. Lever down — --The deliberate action of rotating the safety lever down to put the weapon on safe.

7. Lock your slide to the rear— - --This action is conducted by pushing the slide release lever up after moving the slide to the rear. During this action the muzzle is kept pointed in a safe direction. This action is generally conducted in conjunction with blading yourself to the target.

8. Press or chamber check— - --This action is conducted by placing your thumb on the tang area of the grip of the weapon and placing your index and middle finger on the de-cocking levers. The slide of the weapon is moved to the rear by squeezing your fingers toward your thumb. The purpose of the press check is to allow the shooter to verify that a live round is in the chamber.

9. Safely holster— - The weapon is first placed on safe. The thumb on the hand holding the weapon goes on the rear of the hammer and the support hand guides the weapon back to the holster.

10. Scan and breathe— Scan is the deliberate action of scanning left and right after firing a weapon. The purpose is to aide in breaking tunnel vision during or after a gunfight and to locate additional suspect(s). Breathe is to remind the shooter to control their breathing.

!

“It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood, who strives valiantly; who errs and comes short again and again; because there is not effort without error and shortcomings; but who does actually strive to do the deed; who knows the great enthusiasm, the great devotion, who spends himself in a worthy cause, who at the best knows in the end the triumph of high achievement and who at the worst, if he fails, at least he fails while daring greatly. So that his place shall never be with those cold and timid souls who know neither victory nor defeat.”

Theodore Roosevelt

26th President of the United States of America
