and open doors to otherwise out of reach opportunities.

- (1) Mentoring focuses on the relationship while coaching focuses on a specific task to be accomplished.
- (2) Coaching is not generally performed on the basis that the coach has direct experience of their client's formal occupational role unless the coaching is specific and skills focused
- (3) Both focus on the individual, enhance morale, motivate, productivity, and reduce staff turnover as individuals feel valued and connected with both small and large organizational changes
- (4) Generally prove to be popular amongst employees as coaching achieves a balance between fulfilling organizational goals and objectives, taking into account personal development needs of individual employees. Both the organization and employee gain significant benefits.
 - (5) Coaching and mentoring programs are generally more concerned with the practical issues of setting goals and achieving results within specific time f r a m e s

INSTRUCTIONAL ACTIVITIES

Part I Coaching, Counseling, and Conflict Resolution. The student will participate in exercises to increase self-awareness, reinforce communication skills to promote efficacious counseling, coaching, and conflict management skill sets. Given a description and history of an employee in a real life scenario, the student will

- Identify the problem/issue in work terms, articulate concerns as a supervisor, and possible causes of performance problems.
- Determine the appropriate action, decide on the type of counseling session, identify goals for both the employee and supervisor, and offer resources.
- Create a positive work environment through the application of positive reinforcement and motivation techniques.

Part II Annual Performance Evaluation Review. Distribute selective case studies to evaluate for subjective and objective documentation, the use of proper documentation, an accounting of observed behavior, and the completion of the formal process.

• Identify the elements, the process, and communicating the results.

Printed: 4/10/2025 (WEB)

• Determine proper documentation for a sub-standard, marginal, and outstanding employee.

Part III Training. The student will participate in the formulation of an individualized training plan through the identification of job specific tasks, an analysis of skill sets, education, and certification.

Identify specific skill sets needed for job assignments	
 Identify in-service versus outside training programs Incorporate certification requirements and training mandates 	
3.0 RISK MANAGEMENT

B.	Investigating and documenting personnel issues
	1. Introduction – The area of civil liability is a real and ever-increasing concern in the minds of law enforcement officers, supervisors, and chief administrators in police and sheriff's departments across the country. With the increase of lawsuits and recent case decisions, civil liability deserves very close scrutiny and research. The term "vicarious liability" has recently become a very common word in th law enforcement.

2.	Definition-Vi	icarious lia	bility has	several	long	and	technical	definitions,	but	car
simply	be defined as "	joint or adj	oining res	ponsibil	ity."					

3. Areas of Liability

- a. Negligent performance –The person appointed/hired was unfit and the appointing authority knew or should have known about this unfitness.
- b Negligent retention Retaining an employee who is unfit when the person retaining the unfit employee knew or should have known the unfitness.
- c. Negligent supervision –This arises when the plaintiff can show that the employee, supervisor and/or administrator was under affirmative legal duty to supervise subordinates; that the supervision did not occur; that this failure was negligent; and the negligence was the proximate cause of the plaintiff's injuries.
- d. Negligent assignment Placing a person in a position they cannot adequately perform or keeping a position they cannot adequately perform.
- e. Negligent training The courts have recognized that the hiring entity and its administrator have a affirmative duty to train the persons they employ. Failure to train, as well as improper, inadequate, or nonexistent training, falls under negligent training.
- f Negligent entrustment This most commonly arises in situations of light duty status or errant officers who have been reinstated by Civil Service authority.
- 4. Proximate Cause –is connected with vicarious liability and directly links the supervisor/administrator to liability for acts of his/her subordinates if:

a.	The	plaintiff was	iniure
a.	me	piairiuri was	mijure

- b. The plaintiff's injury was proximately caused by the administrator's negligence in appointment, retention, failure to properly train, or failure to properly supervise the subordinate
- 5. Punitive Damages--Included with vicarious liability is the potential for additional cash damages or award that can be levied against the employee, supervisor, and administrator for negligent action.
 - a. A supervisor or administrator, as a general rule, will suffer no liability for the acts of a subordinate unless the supervisor or administrator:
 - (1) Ordered the act
 - (2) Participated in the act
 - (3) Ratified the act
 - b. Consideration must also be given to the fact: "If there is reasonable expectation that you should have known, or if you knew and took no action, you are just as liable as the person who committed the act.
 - c. Responsibility and liability are burdens that have to be recognized by each level of the supervisory and administrative staff; however, the ultimate burden rests with the department head, the chief of police, or sheriff.
