

Review of Audit Results

After completing the testing instrument, the project manager will review the results and develop audit findings. Throughout the audit, the project manager will coordinate and discuss preliminary results with the auditee. These preliminary results may be used by the auditee to initiate corrective action plans before the completion of the audit. (GAGAS §8.116 – 8.131, Findings, and §9.24, Reporting Findings, Conclusions, and Recommendations).
