# 3-06/200.48 - Identifying Recordings

For each incident recorded on a body worn camera (BWC), Department members shall enter metadata for the event type and other required information using the BWC equipment and software that best describes the content of the recording (i.e. arrest, traffic stop, report) prior to the end of their shift. BWC recordings are not a replacement for written reports or other required documentation such as a log summary in the Deputy Daily Worksheet (DDWS).
