- Take a 40 minute break during the shift, if time permits

- Break times shall be coordinated with an available Adam unit
- Sign in/out on the break sheet located in the lobby of the watch sergeant's office

GATE ARM OPERATION

-

Due to the numerous vehicle incidents, involving the gate arm operation, the following procedure will be utilized:

- When the gate arm is being operated from within the control booth, only one vehicle per activation will be allowed.
- Once the gate arm raises and a vehicle drives through, the gate arm will automatically lower completing the cycle
- All vehicles will be required to wait for the gate arm to cycle and be reactivated for the next entry.
- If the gate arm is "locked" in the open position, the deputy will be required to be outside of the control booth in order to properly direct vehicles
 - The deputy will physically indicate to each vehicle to enter, when appropriate, with the appropriate gesture
 - This procedure will only be used during high vehicle traffic times at the discretion of the main gate deputy.
 - At no time, will the entry gate be "locked" open with the operator deputy inside of the control booth

Deviation from any of these procedures will require approval from South Facility's watch commander.
